REQUEST FOR CORRECTED FILING RECEIPT

RECEIVED

Honorable Commissioner of Patents and Trademarks  
Washington, D.C. 20231

OCT 11 1991

APPLICATION DIVISION-401

Sir:

The present application is a continuation under 37 C.F.R. 1.60 of parent application Serial No. 696,647 filed on January 30, 1985. On April 7, 1989, a Notice of Incomplete Application Filed Pursuant to 37 C.F.R. 1.60 was mailed in this case, pointing out that a copy of the oath or declaration filed in the parent application was missing. On April 24, 1989, a response was filed, enclosing a copy of the declaration filed in the parent application.

It has now been noted that the declaration which was filed with the response of April 24, 1989, was the declaration originally filed in parent application Serial No. 696,647, which contained a typographical error in the serial number of the parent application. Later in the prosecution of Serial No. 696,647,

FILING RECEIPT CORRECTED  
11-06-91 V327

substitute combined declarations and powers of attorney were filed in order to correct this error to thus establish that that application was a continuation-in-part of application Serial No. 06/548,228, filed November 2, 1983.

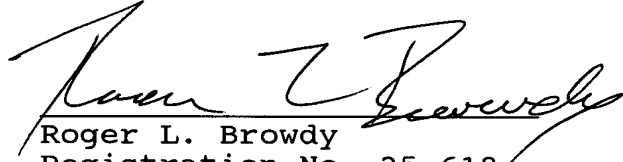

Attached hereto are copies of the combined declarations and powers of attorney filed in application Serial No. 06/696,647 on February 7, 1989 (by certificate of mailing). I hereby verify that the attached papers are true copies of what are shown in my records to be the substitute declarations filed in Serial No. 06/696,647 by certificate of mailing on February 7, 1989.

The official filing receipt in this case does not specify that parent application Serial No. 06/696,647 is a continuation-in-part of application Serial No. 06/548,228 filed November 2, 1983, as evidenced by the attached copies of the declarations of record in the parent case. The filing receipt should have indicated this chain of applications. Furthermore, the patent which issues from the present application should show on its face that the present application is a continuation of application Serial No. 06/676,647, filed January 30, 1985, now patent no. 4,923,805, which in turn was a continuation-in-part of application Serial No. 06/548,228, filed November 2, 1983, now patent no. 4,840,896. This information correctly appears in the first paragraph of the present application.

Issuance of a corrected filing receipt and correction of the records as to the grandparent application of the present application is therefore earnestly solicited.

Respectfully submitted,

BROWDY and NEIMARK  
Attorney for Applicant(s)
